Choose an Index

BBQ Index

Meteomatics' leisure index combines different weather parameters and assesses if weather conditions are favorable for certain outdoor activities or not.
The index ranges from 0 to 1, where 1 means that conditions are perfect for the queried activity at the queried point in time (i.e. the parameter is instantaneous).
The indices are based on a combination of precipitation, temperature, wind speed, wind gusts, humidity, sunshine duration, snow cover, visibility and fog.

BBQ Index vs. Amount spent
Merchant category: Food and beverage services
Canton: SG
Index description: Good conditions for a BBQ are nice weather, warm temperatures and little wind. The index takes into account wind speeds, precipitation, temperature, sunshine duration and fog.

Daily scaled volume
Scaling factor: Average Daily CHF volume of Card payments, Mobile payments and ATM withdrawals in January 2020.

Precipitation vs. Amount spent
Merchant category: Food and beverage services
Canton: SG

**Temperature vs. Amount spent**
Merchant category: Food and beverage services
Canton: SG

Sunshine vs. Amount spent
Merchant category: Food and beverage services
Canton: SG
